The M66 manifold is a large bore, 5-valve manifold for natural gas applications, designed with the Measurement Technician in mind.

While providing all the benefits of a traditional large bore 5-valve manifold, the M66 repositions the equalizer and vent valves to provide maximum clearance for hands and fingers during operation. The M66 accomplishes this while maintaining the same sleek manifold profile without comprising body wall thickness and maintain the same space requirements as our standard Large Bore Manifold.

The M66 is available in Carbon Steel and 316 SS, and in 1/2” FNPT x Flange, and Flange x Flange configurations. The M66 carries the same pressure and temperature rating of the M65 and the same easy calibration port access. We also use only B7 carbon steel bolts, B8M 316 SS bolts, or 18-8 SS bolts.

**Product Overview**

**3/8-inch [9.5 mm] Orifice**

This product series parallels the M6A series but with the larger 3/8-inch [9.5 mm] orifices. The series was developed to answer two needs: 1) a larger valve orifice to assure positive line drainage where wet gas and hydrates are a problem; and 2) to match the flange tap drilling of 3/8-inch [9.5 mm] reducing signal variance when pulsating flow is experienced and the manifold (M66A) is mounted as close to the flange outlet as practical.

**Features and Benefits**

- The valves are identical for all three manifold configurations:
  - M66T - pipe x flange
  - M66A - flange x flange
  - M669A - 90° flange x flange

- The M66T and M66A may be pipe-stand mounted with the appropriate AGCO Mount Kit to support a differential transmitter. Advantages of AGCO Mount are: that installation may be made prior to availability of the transmitter; and, easier and faster removal of transmitter for maintenance since transmitter is supported only by the manifold.

- The seats are field replaceable without removing the manifold.

- Bonnet assemblies have blow-out proof stems that seal and isolate the packing when the valve is fully open.

- O-ring Packing is below the stem threads for corrosion protection.

- Soft seats are available in a variety of materials to suit sweet or sour gas.
Specifications

M66A Dimensions, inches [mm]

<table>
<thead>
<tr>
<th>Packing</th>
<th>A</th>
</tr>
</thead>
<tbody>
<tr>
<td>Teflon®</td>
<td>11.90 [302.3]</td>
</tr>
<tr>
<td>O-ring</td>

</tbody>
</table>

Notes

1. Approximate valve weight: 7.6 lb [3.4 kg].
   0.375-inch [9.5 mm] diameter orifice. Valve Cv 3.0 maximum.
2. Bottom static pressure connections ¼-inch - 18 NPT available.
3. Installation Kit consists of 4 bolts ¼-inch - 20 x 1-inch A193-B7, 4 washers, and 2 Teflon® gaskets.

Packing

- V – Teflon® (patent protected)
- R – O-ring

Seat (cone)

- Soft (Block valves only)
  - V – Teflon®
  - D – Delrin®
  - E – PEEK
  - K – PCTFE

Body Material

- C – CS (zinc cobalt plated to resist corrosion), A105
- S – SS, A479-316

Process Connections

- M66T Only
  - 4 – 1/2-inch FNPT

Options Code

- AM AGCO Mount Kit for 2” pipestand mounting of manifold (AGIMC-0344, pg 138).
- BC Accessory bracket for mounting conduit with AGCO Mount.
- BP Accessory bracket for mounting purge meters with AGCO Mount.
- CL Cleaned for Chlorine Service.
- HD Hydrostatic testing - includes test report (MSS-SP-61)
- OC Cleaned for Oxygen Service.
- R3V Add when mounting to Rosemount® Model #3051C, 2024, -3095. Specify on all components. Use SS columns for rating.
- SG NACE MR0175/ISO 15156-3 Corrigendum 2 (for Chloride conditions ≤ 50 mg/l [ppm]) and NACE MR0103-2005 (97 mounting bolts standard, SS mounting bolts optional) (SS valves only) (not available for O-ring packed valves)
- SG3 NACE MR0175/ISO 15156-3 Corrigendum 2 (for Chloride conditions > 50 mg/l [ppm])
- SSA SS flange bolts (Grade 18-8) - Max pressure rating 4500 psi [310 barg]
- SSC SS flange bolts (316 SS) - Max pressure rating 4500 psi [310 barg]
- TB Static/Test Ports (bottom of manifold)
  - 1/4”-18 NPT, 2 places, M66A, M66T only
- EL () Installed street elbows in static test ports
  - EL1 – Elbow facing bottom of manifold (M66A, M66T only)
  - EL2 – Elbow facing outlet of manifold
  - EL3 – Elbow facing top of manifold
- SP Special Requirements - provide complete description of requirements.
