

Dräger X-am[®] 8000 Multi-Gas Detector

Clearance measurement was never this easy and convenient: The Dräger X-am® 8000 measures up to seven gases, including toxic, flammable gases and vapors, and oxygen all at once—either in pump or diffusion mode. Innovative signaling design and handy wizard functions ensure complete safety throughout the process.

Switch easily between pump and diffusion mode

Impact detection informs you of severe mechanical stresses

Intuitive smart assistants for clearance measurement, leak detection, and benzene-specific testing with the PID (pre-tube)

Glowing green D-light indicates that the unit is tested and ready for use

Five slots for DrägerSensors® to measure up to seven gases, two new high-performance PID sensors

Easy-to-read color display with zoom function

Inductive charging for reduced maintenance

Benefits

Specially designed for use with its internal pump, optimized for your requirements

The Dräger X-am® 8000 is equipped with a very powerful internal pump. It can be connected with hoses of up to 45 meters in length. A pump adapter makes it easy to switch between diffusion and pump mode at any time. This means the pump is only operated when you actually need it. That saves energy, reduces wear and tear, and thereby extends the lifespan of the pump.

Handy and durable, the Dräger X-am® 8000 is intuitive to operate single-handedly using three function keys. The easy-to-read color display clearly lays out all the information for you.

Standard accessories include a sturdy shoulder strap, so you can comfortably carry the X-am 8000. Thanks to its compact and robust construction, the device can withstand even the harshest conditions.

Clearance measurement, release and documentation in no time

The X-am 8000 effectively supports various applications with specially developed assistant functions that guide you through each process step by step. During clearance measurement, for example, the smart assistant calculates the necessary flooding time for the device and probe (FKM hose) based on parameters such as measuring gases, temperature limits, and the indicated hose length.

When monitoring for high methane concentrations, a configurable automatic measurement range switch makes it easier to take a reading: if the Cat-Ex sensor measures values above 100% LEL, the display switches to the range of 0 to 100 vol%.

Clear signaling design

The signal system of the Dräger X-am 8000 is based on a clear color code:

- Red light = gas alarm
- Yellow light = device-related alarm, e.g. low battery
- Green light = device is ready for use

The green glow of the D-light allows you to see from a distance whether the device has been properly tested and is ready for use.

In case of an alarm, the X-am 8000 alerts you with colorful alarm LEDs, a loud horn (100 dB(A) at a distance of 30 cm), and clearly palpable vibration. Optionally, four preset hazard symbols are available for the display which explicitly indicate the presence of explosive or toxic gas hazards, for example. This allows the user to easily recognize the type of hazard based purely on the symbol displayed.

The X-am 8000 is equipped with a shock detection system. The event report indicates whenever severe mechanical impacts have occurred that might result in functional impairments of the device or the sensors. These are also documented in the data logger.

Benefits

Economical Fleet Management

Bumptest and calibration are carried out simply and quickly using the Dräger X-dock® calibrating station. Its low test gas consumption keeps operating costs to a minimum.

Its reporting function and numerous other useful features make the X-dock Manager PC software a smart addition to any fleet management operation. To identify the devices in the fleet, you can either use tried and tested barcodes or an integrated RFID transponder.

Specialist for high and low hydrocarbon concentrations

To measure hard-to-detect hydrocarbons, you can fit the Dräger X-am 8000 with one of two high-performance PID sensors. The PID HC covers a measurement range of 0 to 2,000 ppm (Isobutene). The PID LC ppb is particularly suited for a measurement range of 0 to 10 ppm (Isobutene) with a resolution in the range below 1 ppm.

For benzene-specific measurements, the X-am 8000 can be used with a pre-tube. The advantage: you only need one measuring device for this application, which significantly reduces the costs of purchasing, maintaining and transporting devices in use. The use of the pre-tubes is supported by a built-in assistant.

Inductive charging protects against wear and tear

The X-am 8000 features inductive charging. This makes it easier to operate and increases the lifespan of the device. Issues like corrosion and contact problems in the charging cradle are a thing of the past. You can charge (outside of explosion-hazard zones) and measure at the same time, e.g, when in use inside vehicles or on machinery.

The charging cradles can connect with one another, taking up minimal space, and are compatible with existing Dräger X-am® series cradles.

At a Glance Features of the Dräger X-am® 8000

eatures	Dräger X-am® 8000
lumber of measuring gases	1 to 7
nternal pump, activated with pump adapter	Yes, optional
nductive charging	Yes
Customer-specific settings when ordering	Yes
Shoulder strap included as standard	Yes
Catalytic bead sensor DrägerSensor CatEx 125 PR	Yes, configurable
Available electrochemical (EC) DragerSensors: (XS O ₂ , XXS CO LC, XXS H ₂ S LC, XXS NO ₂ , XXS SO ₂	Yes, configurable
Electrochemical (EC) DrägerSensors: other sensors/special gases	Yes, configurable
nfrared (IR) DrägerSensors Dual IR Ex/CO ₂ , IR-Ex, IR-CO ₂	Yes, configurable
Photoionization detector (PID) DrägerSensors: PID HC, PID LC ppb	Yes, configurable
Automatic measurement range switching for the catalytic pead sensor, catalytic bead sensor, measuring gas: methane	Yes, configurable
Assistants: Confined Space, Leak Search, Benzene/Pre-Tube	Yes, only when a pump is installed
Event report (incl. shock detection)	Yes, configurable

Accessories

Inductive charger

Inductive charging reduces maintenance because there are no metal contacts required for charging.

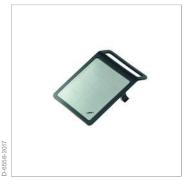

Pedestal

Use to stand the device upright for area monitoring. The pedestal can be used with or without a shoulder strap.

Protective rubber boot

Prevents damage and wear in harsh environments. The protective boot can easily be replaced by the user.

Adhesive label

The adhesive label attaches to the bottom of the X-am and can have device-specific information inscribed on it, such as the sensor configuration.

Services

Dräger Service

When your operation's safety equipment is backed by over 125 years of experience and supported by the same team that engineered it, you can rely on service and rental solutions that are tailored to meet your unique needs. With Dräger's safety solutions, you get complete peace of mind, budget security, and full-service support that you can count on every step of the way. That's the Dräger Service Advantage.

Technical Data

Dimensions (H x W x D)	7.0 x 3.0 x 1.7 in (179 x 77 x 42 mm)			
Weight	Approx. 495 g (17.5 ounces), depending on sensor configuration, without swithout pump			
	Approx. 550 g (19.4 ounces), depending on sensor configuration, without strap,			
	with pump			
Housing	Durable two-component housing			
Display	High-contrast color display			
Temperature	-4° F to 122° F (-20° C to 50° C)			
Pressure	700 to 1,300 hPa			
Relative humidity	10 to 90% (short-term up to 95%) r.h.			
Alarms	Visual:	3 LED 'red' (gas alarms),		
		3 LED 'yellow' (device alarms)

Ordering Information

Dräger X-am[®] 8000 83 25 800

consists of

Device with power supply (Lithium-ion battery), data logger, shoulder strap, manufacturer's certificate, certificate of calibration, and charger (optional). A fully functioning device allows up to 5 sensors and an optional integrated pump. Instruction for use included as standard in the following languages:

DE, EN, FR, ES, PT, IT, NL, RU, ZH, JA

Free instruction for use on request (please indicate when ordering), also available in the following languages: DA, FI, NO, SV, PL, HR, SL, SK, CS, BG, RO, HU, EL, TR, KO
