

ANDERSON GREENWOOD SERIES M5/M51 MULTI-PORT GAUGE VALVES

Compact, lightweight multi-port valves for pressures up to 6,000 psig (414 barg) or 10,000 psig (690 barg)

M5

M51

FEATURES

- Cost savings through minimized components and process penetrations for multiple instrument installations with reduced possible leak points.
- Compact design minimizes space requirements; low weight improves connection strength and reduces gauge whip.
- Long body option allows up to 4" (102 mm) pipe insulation.
- Replaceable soft seat and can operate in dirty service with repetitive bubble-tight shutoff.
- Repairable metal seat can be resurfaced without removing the valve from the line.
- Ball end stem eliminates seat galling, provides bubble-tight shutoff and long life. Hardened, non-rotating ball ensures perfect alignment closure.
- Packing below threads prevents lubricant washout, thread corrosion, process contamination and eliminates galling.
- Easily adjustable packing decreases replacement downtime and increases valve life.
- Safety back seating prevents stem blowout or accidental removal and provides a metal-to-metal secondary stem seal while in the fully open position.
- ENC plated 316 SS prevents galling or freezing of stem threads.
- Rolled stem, bonnet and male NPT threads provide additional strength.
- Mirror stem finish in the packing area enables smooth operation and extends packing life.
- Metal-to-metal body-to-bonnet seal in constant compression prevents bonnet thread corrosion, eliminates possible tensile breakage and gives a reliable seal point.

GENERAL APPLICATION

M5 valves allow the versatile positioning of gauges or pressure switches without requiring additional penetration of the main piping. The M51 is a metal seat version for high-pressure applications.

TECHNICAL DATA

Materials:	CS, SS, Monel
Seats:	Metal and soft
Connections:	½" to ¾" NPT; welded also available
Pressure (max.)	
M5:	6,000 psig (414 barg)
M51:	10,000 psig (690 barg)
Temperature (max.)	
M5:	1000°F (538°C)
M51:	500°F (260°C)

ANDERSON GREENWOOD SERIES M5/M51 MULTI-PORT GAUGE VALVES

PRODUCT OVERVIEW

The standard configuration has a male or female inlet and three 1/2" FNPT outlet ports. All valves with male inlet connections are available threaded or prepared for welding (socket weld or butt weld) and with either standard or extended length inlet.

BONNET ASSEMBLY OPTIONS

The M5 offers the option of a metal seat or a roddable soft seated design with replaceable seats, providing easy cleanout.

The M51 is only available with a metal seated bonnet assembly for 10000 psig (690 barg) service. All stem threads are rolled and lubricated to prevent galling and reduce operating torque. The stem seal is a patented PTFE packing which is adjustable in service. All bonnets are assembled with a bonnet locking pin to prevent accidental removal while in service and a protective dust cap is fitted to contain stem lubricant and prevent the influx of contaminants. The M5 gauge valve is available with a Grafoil bonnet for high temperature applications.

SOFT-SEATED BONNET ASSEMBLY

The soft-seated bonnet assembly has a one-piece rotating stem and plug. In addition to the adjustable PTFE packing gland, the bonnet is available with a FKM O-ring with PTFE back-up ring.

METAL-SEATED BONNET ASSEMBLY

The metal-seated bonnet assembly has a rotating stem with free swivel ball-type seat for long service life. The specially hardened ball seat is ideal for both gas and liquid service.

The high pressure M51 bonnet assembly uses a strengthened stem and bonnet which is fitted with a larger size T-bar handle.

The M5's high-temperature bonnet assembly utilizes a similarly designed stem and bonnet, incorporating adjustable graphite and back-up pressure rings to ensure a leak-free stem seal.

M5 AND M51 METAL SEAT DIMENSIONS, INCHES [mm]

NOTES

1. M5 metal seat only.
2. Approximate valve weight:
Standard 2.5 lb [1.1 kg].
Long 3.0 lb [1.4 kg].
Orifice size: 0.187 inch [4.8 mm] diameter. Valve C_v 0.523 maximum.
Long body length 7.25 inch [184.2 mm] for 4 inch [102.0 mm] insulation.
3. For Hastelloy[®] and SG3 call factory for dimensions and weights.

M5 SOFT SEAT DIMENSIONS, INCHES [mm]

NOTE

1. Approximate valve weight:
Standard 2.5 lb [1.1 kg].
Orifice size: 0.187 inch [4.8 mm] diameter. Valve C_v 0.83 maximum.
2. For Hastelloy[®] and SG3 call factory for dimensions and weights.

NOTES

- CS is zinc-cobalt plated to prevent corrosion.
- SG (Sour Gas) meets the requirements of NACE MR0175/ISO 15156 (for chloride conditions \leq 50 mg/l (ppm)) and NACE MR0103-2005.
- PEEK and PTFE also available.
- PCTFE (Polychlorotrifluoroethylene) is the exact equivalent of Kel-F[®].
- SG3 (Sour Gas) meets the requirements of NACE MR0175/ISO 15156 (for chloride conditions $>$ 50 mg/l (ppm)).
- Elgiloy[®] is a registered trademark of Elgiloy Specialty Metals.

PRESSURE AND TEMPERATURE RATINGS

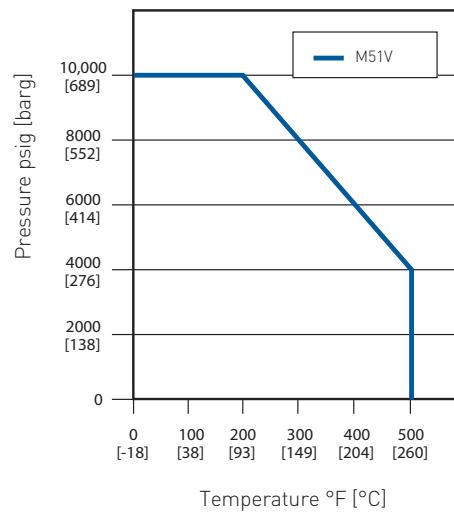

Valve	Packing	Ratings
M5 Metal seat		
CS	GRAFOIL [®] ,	6000 psig at 200°F [414 barg at 93°C]
	Low emission graphite	1500 psig at 850°F [103 barg at 454°C]
SS, SG, SG3	GRAFOIL [®] ,	6000 psig at 200°F [414 barg at 93°C]
	Low emission graphite	1500 psig at 1000°F [103 barg at 454°C]
CS, SS, Monel [®] , SG, SG3	PTFE	6000 psig at 200°F [414 barg at 93°C]
		4000 psig at 500°F [276 barg at 260°C]
M51 Metal seat		
CS, SS, SG, SG3	PTFE	10,000 psig at 200°F [689 barg at 93°C]
		4000 psig at 500°F [276 barg at 260°C]
M5 Soft seat		
CS, SS, Monel [®] , SG, SG3	PTFE	6000 psig at 200°F [414 barg at 93°C]

NOTES

- Temperature (min.) M5/M51 PTFE or Grafoil packing: -70°F [-57°C].
- M51 in 316L material maximum pressure rating: 9000 psi at 200°F; 4000 psi at 500°F.

ANDERSON GREENWOOD SERIES M5/M51 MULTI-PORT GAUGE VALVES

PRESSURE VS. TEMPERATURE1 - M5 AND M51 METAL SEAT

NOTE

M51 in 316L material maximum pressure rating: 9000 psi at 200°F; 4000 psi at 500°F.

PRESSURE VS. TEMPERATURE - M5 SOFT SEAT

NOTES

- O-ring packed soft seat valve 400°F [204°C] maximum.
- PCTFE (Polychlorotrifluoroethylene) is the exact equivalent of Kel-F[®].
- Temperature (min.) M5/M51 316SS PTFE or Grafoil packing: -70°F [-57°C].
